

ASPHALT SHINGLE ROOF SYSTEMS

1. General Information	327
2. Components	327
2.1 Asphalt Shingles	327
2.1.1 Materials.....	328
2.1.1.1 Asphalt and Fillers.....	328
2.1.1.2 Reinforcing	329
2.1.1.3 Surfacing.....	329
2.1.1.4 Self-sealing Strip	329
2.1.2 Standards.....	330
2.2 Underlayment.....	330
2.2.1 Asphalt-saturated Felt.....	330
2.2.2 Polymer-modified Bitumen Sheet Underlayments.....	331
2.2.3 Ice Dam Protection Membranes.....	332
2.3 Asphalt Roof Cements	332
3. Design Considerations	333
3.1 Roof Deck.....	333
3.1.1 Wood Plank and Board Decking	333
3.1.2 Structural Wood Panel Decking.....	333
3.1.3 Preservative-treated and Fire-retardant-treated Wood	334
3.1.4 Other Deck Types.....	334
3.1.5 Steep-slope Compact Roof Assemblies	335
3.1.5.1 Nail-base Insulation Systems.....	335
3.2 Underlayment and Roof Slope	335
3.2.1 Underlayment Configurations	336
3.2.2 Roof Slope	336
3.3 Ice Dam Protection Membranes	339
3.4 Fasteners	340

3.5 Exposure and Appearance.....	342
3.5.1 Starter Courses	342
3.5.2 Offset Patterns.....	342A
3.6 Flashings	344
3.6.1 Perimeter Edge Metal.....	344
3.6.1.1 Bleeder Strips	345
3.6.2 Penetration Flashings	345
3.6.3 Valley Construction.....	346
3.6.3.1 Open Valleys.....	347
3.6.3.1.1 Enhanced Open Valleys	348
3.6.3.2 Closed-cut Valleys	349
3.6.3.3 Woven Valleys	349
3.6.4 Vertical Surfaces	350
3.6.4.1 Apron Flashings.....	351
3.6.4.2 Step Flashings	352
3.6.4.3 Cricket or Backer Flashings	354
3.6.4.4 Counterflashings.....	356
3.7 Standards Applicable to Asphalt Shingle Roof Assemblies.....	358
